held at Copenhagen Business School, Denmark, March 17-21, 1997

Working hours: 125

---

**Course description**

The course will give an advanced introduction to philosophy of science with special emphasis on problems concerning the constitution of disciplines in the areas of management and business sciences. Special emphasis will also be given to the relation between basic and applied science and an analysis of the various research paradigms in the field. Special treatment will be given to: rationality, method and methodology, empiricism and phenomenology, theory-construction, application of theories to solution of practical problems, the status of the social and the object of the social sciences, objectivity and relativism.
